Auger Filling Machine

Stylo Pack offers advanced auger filling machines ideal for precise dosing of powders, granules, and viscous materials. Available in semi- and fully automatic models, our machines ensure clean, accurate, and dust-free filling with minimal maintenance. Designed for high efficiency and integration, they streamline packaging operations across industries. Trusted across India, we deliver performance, durability, and value with every unit.

Cup Filling Machine

Stylo Pack is a trusted supplier of volumetric cup filling machines in India, offering precision solutions for filling liquids by volume. Our machines ensure accurate, consistent output using advanced sensors and durable construction. Ideal for a range of industries, they support automation and easy software control. With over a decade of experience, Stylo Pack delivers reliability, performance, and innovation in every unit.

Multi-Head Packing Machine

Stylo Pack, a leading multi-head packing machine manufacturer in India, offers high-precision machines ideal for the food packaging industry. Equipped with advanced weighing heads, hoppers, and control systems, they ensure accurate, efficient, and uniform packaging. Our automated solutions in Kanpur reduce labor costs, minimize errors, and boost productivity for high-demand operations.

Our Clients

Quality Assurance

At Stylo Pack, quality is a core commitment embedded in every stage of our process—from raw material sourcing to final delivery. As an ISO 9001:2015 certified company, we uphold global standards through rigorous inspections and performance testing. Our dedicated QC team ensures consistency, durability, and safety by closely monitoring each production phase under a strict zero-defect policy.

Why Choose Stylo Pack

- Use of high-grade raw materials sourced from trusted vendors
- Strict in-process checks and quality audits
- Final product testing against international standards
- Continuous improvement through feedback, training, and innovation
- Compliance with industry norms and environmental regulations
